Pittsburgh, PA 15238

Subject: Fox Chapel Authority  
Annual Report for the Year Ending  
December 31, 2025 and Recommended  
Budget for the Year Ending December 31, 2026

Dear Board Members:

As Consulting Engineer for the Authority, we submit the Annual Report for the year ending December 31, 2025, and the Recommended Budget for the fiscal year ending December 31, 2026.

This report contains our analyses and projections of revenues, expenses and capital improvement needs for the coming year.

The budgeted revenues and expenses for the coming fiscal year, as compared to the anticipated revenues and expenses for the year ending December 31, 2025, are as follows:

|                        | Year<br>Ending<br>12/31/2025 | Budget Year<br>Ending<br>12/31/2026 | Increase<br>(Decrease) | % Change |
|------------------------|------------------------------|-------------------------------------|------------------------|----------|
| Operating Revenues     | \$7,086,672                  | \$6,811,000                         | (\$275,672)            | -3.9%    |
| Operating Expenditures | \$5,844,574                  | \$6,470,050                         | \$625,476              | +10.7%   |
| Net Operating Revenue  | \$1,242,098                  | \$340,950                           | (\$901,148)            | -72.6%   |

The estimated operating revenue for the next year is \$275,672 less than the operating revenue for the year ending December 31, 2025. The revenue estimate for 2026 does not include a rate increase to the general water rates for 2026. Also, a 20% Pittsburgh Water and Sewer Authority (PWSA) rate increase is anticipated for 2026. As a result, the Authority's current rates will allow it to continue its capital program. The revenue estimate was based upon conservative assumptions regarding customer growth. It was assumed that water sales patterns for 2026 would be more conservative than the Authority's experience in 2025, which was an extremely dry year, especially with regard to domestic sales.

The budgeted expenses for 2026 are \$625,476 more than the expenses for the year ending December 31, 2025. The expense estimate includes provisions to accommodate inflation. The expense budget includes the assumption that the rate of unaccounted-for water loss during 2026 will be 20%, 8.7% lower than the rate of loss experienced over the twelve months ending December 31, 2025. The loss rate calculation methodology was changed to the AWWA standard in 2018.

Payments required from the net income during the coming fiscal year ending December 31, 2026, at the current debt load are as follows:

|                                         |           |             |
|-----------------------------------------|-----------|-------------|
| Net Operating Revenue                   |           | \$340,950   |
| Non-Operating Revenue                   |           | \$60,000    |
| Total Available                         |           | \$400,950   |
| Interest on Debt                        | \$66,343  |             |
| Principal on Debt                       | \$497,914 |             |
| Total Debt Service                      |           | \$564,257   |
| Unallocated Earnings Before Adjustments |           | (\$163,307) |
| Plus Principal Payments                 |           | \$497,914   |
| Less Depreciation                       |           | (\$550,000) |
| ACCRUED UNALLOCATED EARNINGS            |           | (\$215,393) |

#### FOX CHAPEL AUTHORITY

The Authority was created by Fox Chapel Borough and the Townships of Harmar, Indiana, and O'Hara in accordance with the Pennsylvania Municipality Authorities Act of June 28, 1935, Act 191, its amendments and supplements, for a term of 50 years. The Authority was incorporated on September 23, 1938.

The Authority is authorized to acquire, hold, construct, improve, maintain, and operate various projects including water works, water supply and water distribution systems, and to borrow money, and to make and issue negotiable bonds.

On January 1, 1952, the Authority entered into a Trust Indenture with Peoples First National Bank and Trust Company (now PNC Bank), under which the Authority determined to issue an initial series of bonds to be designated "Fox Chapel Authority Water Works Revenue Refunding and Improvement Bonds, Series A" in the principal amount of \$470,000. The monies from the Bond Issue were used to redeem and pay all 3¼% and 4% Water Works Revenue Bonds outstanding and to pay all other charges, costs, and expenses then due, and obtain a release of liens and complete satisfaction of the Indenture of Trust, dated January 1, 1939.

To continue to make improvements to the water system, four supplemental indentures were issued. Series B, C, D, and E were issued under First, Second, Third, and Fourth Supplemental Indentures dated as of July 1, 1952, January 1, 1957, May 1, 1964, and September 1, 1968, respectively. In connection with the Series C Supplemental Indenture, the term of the Authority was extended to 50 years from March 19, 1957. To provide funds for the construction of an office, distribution center, and garage complex, a capital construction note was secured on July 10, 1981, in the amount of \$1,139,000.

A new Trust Indenture was entered into with PNC Bank on June 1, 1987, to redeem all outstanding bonds, as well as to fulfill all remaining obligations of the capital construction note secured in 1981. The principal amount of the 1987 Bond Issue was \$1,300,000.

On June 5, 1992, the Authority entered into an agreement with the Trustee for a construction loan in the amount of \$1,300,000. The construction loan was to have been repaid over a period of five years.

On July 28, 1995, the Authority obtained a \$5,000,000 loan from PNC Bank. Using a portion of the loan proceeds, the Authority retired all outstanding 1987 Bonds and defeased the Trust Indenture. Similarly, the outstanding principal of the 1992 construction loan was repaid. The \$5,000,000 bank loan had a term of seven years.

On September 3, 1996, the life of the Authority was extended to December 31, 2030.

On May 15, 1997, a new Trust Indenture was entered into with PNC Bank, National Association, as Trustee. Bonds were issued in the principal amount of \$10,565,000. The Authority used a portion of the proceeds to pay the remaining balance of the 1995 bank loan. The remainder of the funds was allocated to support its capital improvement program.

On December 15, 1997, the Authority issued Series 1997A bonds in the amount of \$11,700,000. The proceeds of the Series 1997A issue were used to refinance the 1997 bonds and to provide an additional \$408,000 in funds available for capital improvements.

On August 16, 1996, the Authority secured a loan commitment from the Pennsylvania Infrastructure Investment Authority (PENNVEST). The amount of the loan commitment was \$2,780,000, and the term of the loan was for twenty years. The loan closing was held on February 10, 1998.

On January 8, 2003, the Authority issued Series 2003 Bonds in the amount of \$11,370,000. The proceeds of the bond issue were used to refinance the 1997A bonds at a lower interest rate. The Authority realized its savings in lower debt service cost during the first few years of the issue.

On July 11, 2006, the Authority entered into a Constant Maturity Swap agreement, a type of interest basis swap agreement where the Authority made semi-annual interest payments on the amount of the outstanding principal of its Series 2003 Bonds based upon the BMA (Bond Market Association Index) and received interest semi-annually on the amount of the outstanding principal of its Series 2003 Bonds based upon 67.896% of the 10-year London Interbank Offered Rate (LIBOR). The Constant Maturity Swap agreement was terminated on June 20, 2008.

On June 30, 2012, the life of the Authority was extended to December 31, 2050.

On August 22, 2012, the Authority issued Series 2012 Bonds in the amount of \$9,865,000. The proceeds of the bond issue were used to refinance the Series 2003 Bonds and the 1996 Pennsylvania Infrastructure Investment Authority (PENNVEST) loan. With the refinancing, the debt term increased five years and the annual debt service requirement was lowered by approximately \$259,000. After all fees and expenses related to the bond issue, the refinancing resulted in a net present value savings to the Authority of \$1,183,000. As of September 30, 2017, the total funded debt of the Authority is \$7,978,000. On November 20, 2017, the Authority defeased the 2012 Bond Issue with a loan from First National Bank in the amount of \$7,200,000.

The current Members of the Authority Board are as follows:

| <u>Board Member</u> | <u>Office</u>                     | <u>Appointing Municipality</u> | <u>Term Expiration</u> |
|---------------------|-----------------------------------|--------------------------------|------------------------|
| Andrea C. Lehman    | President                         | Fox Chapel Borough             | 12/31/2030             |
| Jason A. Domaratz   | Vice President                    | Harmar Township                | 12/31/2026             |
| Donald H. Newman    | Treasurer                         | Fox Chapel Borough             | 12/31/2028             |
| Nancy S. Snider     | Secretary                         | O'Hara Township                | 12/31/2027             |
| Christian A. Pegher | Assistant Secretary/<br>Treasurer | O'Hara Township                | 12/31/2028             |
| Paul A. Iurlano     |                                   | O'Hara Township                | 12/31/2029             |
| Sandra M. Mantia    |                                   | Indiana Township               | 12/31/2027             |

The consultants and professional staff currently retained by the Board are as follows:

Ryan R. Verbanic, Manager  
Dinsmore and Shohl, LLP, Solicitor  
Labor Relations Solicitor – To be determined  
Maher Duessel, Auditor  
Bankson Engineers, Inc., Consulting Engineer  
FNB Wealth Management, Investment Banker

## REVIEW OF PAST YEAR OPERATIONS

During the year ending December 31, 2025, the Authority delivered 692,906,000 gallons of water to the system and billed for 494,263,000 gallons. As of December 31, 2025, the Authority was providing water service to 5,761 customers. Schedule X in the Appendix shows the record of customer growth, water delivery, and water sales since 1998.

Water sales for the year ending December 31, 2025 were slightly less than water sales during 2024. There were no dramatic changes to the customer base or other factors which would contribute meaningfully to changes in the consumption patterns. As is shown on Schedule XII, the average annual consumption per residential customer over the last year has slightly decreased from 2024.

A record of gross annual consumption by each customer class since 1998 is tabulated on Schedule XI.

A record of the numbers of Authority customers in each of the customer classes from 1997 to present is shown on Schedule XIII.

During the past year, the Authority experienced a peak day delivery of 3,370,000 gallons or 133% of the average day delivery. Over the previous 28 years, the peak day delivery fluctuated between 206% and 133% of average day delivery. Peak day delivery data for each year since 1998 is shown on Schedule X.

Between 2004 and 2007, the rate of unaccounted-for water remained relatively stable at about 18%. In 2008, the rate of unaccounted-for water loss declined sharply to 14.0%, and then rose to 17% during 2009. Between 2009 and 2012, the rate of unaccounted-for water loss steadily declined to 14.4%. Between 2012 and 2014, however, the rate of unaccounted-for water loss increased to 21.7%. Since 2014, the rate of unaccounted-for water loss declined steadily to 14.9% in 2016 and increased to 25.2% as of December 31, 2018. In 2018, the loss calculation was changed to reflect the AWWA standard. Unaccounted-for water loss rates since 1981 are presented in the Appendix in tabular form on Schedule X. From 2019 to 2024, the rate of unaccounted-for water loss has steadily decreased from 29.5% to 18.5%; however, the rate of unaccounted-for water loss, as of December 31, 2025, is 28.7%.

The record of consumption by the Authority's largest customers is presented on Schedule XIV.

Schedule VIII in the Appendix is a five-year comparison of revenues and expenses.

Schedule V in the Appendix shows the capital additions completed during the years 2020 through 2025. As is shown on Schedule V, a total of 6,880 linear feet of new water lines were installed by Authority forces. In addition, a contractor replaced 1,660 linear feet of water line along Cabin Lane, and developers installed 3,393 linear feet of water line at Fox Chapel Plaza, Hidden Grove Estates, Miramar Landings, Hidden Falls Point, and Rock Creek Road.

A record of all water mains installed since 1994 is shown in tabular form on Schedule VI. Since 1994, 38.83 miles of water lines or 34.06% of all pipeline in the Authority's distribution system, have been installed. Of that work, Authority forces have installed 12.35 miles of water main, 10.83% of all water mains in the Authority's distribution system.

A pipeline inventory is presented in Schedule VII. It includes the record of distribution system footages. It also shows the Authority's efforts, since 1988, in replacing or rehabilitating problem-prone pipeline. Since 1988, the Authority has retired 24.11 miles out of 25.72 miles of its problem-prone pipeline or 93.7%.

Schedule VII also includes a tabulation of water line breaks each year since 1988. Over the past 38 years, the Authority has averaged 96 breaks per year. From 1988 through 1995, the Authority averaged 139 breaks each year. Between 1996 and 2007, the average number of breaks per year fell to about 98. Over the past 18 years, the average number of breaks per year has fallen to 76. There were 76 breaks during the year 2025 (as of December 31, 2025).

The Authority continues to be a very well operated public water system.

### LEAK DETECTION

Starting in the Year 2020, the Authority has employed Aqua Tech Leak Detection Services on a regular basis to assist in finding water system leaks in order to reduce the Authority's water loss percentage. Beginning in 2023, the Authority started investing in technology, training, and equipment that will allow it to perform leak detection with its own personnel. Per Schedule IX, 24 leaks have been found and repaired due to leak detection in the Year 2025. The 34% water loss percentage at the beginning of Year 2020 has been reduced to 18.5% (end of Year 2024), but has increased to 28.7% at the end of Year 2025. The yearly percentage of unaccounted for water can be seen on Schedule VII.

Per Schedule IX, the Authority experienced a water loss cost savings of approximately \$30,565 in the Year 2025 due to the continued utilization of leak detection services. In addition, it is anticipated that the Authority will save tens of thousands of dollars in repair and restoration costs due to detecting water system leaks before they become large water line ruptures that would require significant restoration by Authority forces.

It is recommended that the Authority continue its leak detection services program for the Year 2026.

### OPERATING AND MAINTENANCE RECOMMENDATIONS FOR 2026

It is recommended that the Authority continue its sound operation and maintenance practices. In general, the Authority's facilities are in good repair.

It is recommended that the Authority continue its aggressive approach toward the replacement of problem-prone pipeline.

It is recommended that the Authority maintain insurance coverage on its physical assets in the amounts indicated on the tabulation presented in Schedule XV in the Appendix. Also included in Schedule XV is a summary of the Authority's current insurance protection.

The Authority intends to complete certain non-routine maintenance work items and to purchase certain major equipment items during 2026 and beyond. The more significant of these items are shown on Schedule II in the Appendix.

### BUDGET FOR 2026

The recommended Budget for 2026 is included on Schedule I in the Appendix. The revenue projections for the 2026 Budget were based upon the current rates for water consumption (adopted July 1, 2024). The current rates are shown on Schedule IV in the Appendix.

The assumptions used in the budget preparation were somewhat conservative. The Budget for 2026 was prepared using the actual consumption numbers for the years 2021 through 2025. In projecting expenses, it was assumed that the rate of unaccounted-for water loss would be 20%, 8.7% lower than the rate of unaccounted-for water loss for the end of Year 2025. Other assumptions used were a general rate of inflation of 3%.

Total water sales are projected to be \$5,950,000 during 2026, with sales to the Authority's customer base (non-resale) customers projected to be \$5,650,000 and sales to resale customers (Blawnox and Aspinwall) projected to be \$300,000.

For 2026, it is anticipated that operating revenues will be \$6,811,000. Non-operating revenues are expected to be \$60,000. Thus, the projected total revenue is \$6,871,000. Operating expenses for 2026 are expected to be \$6,470,050. The net available for debt service, or Gross Income, is projected to be \$400,950.

The 2026 Budget includes debt service provisions for the 2017 Bank Loan, which was refinanced in December 2021 to take advantage of the low interest rates and accounts for \$241,409 in interest savings for the Authority.

A comparison of the recommended 2026 Budget with the actual revenues and expenses over the past five years is included in Schedule VIII in the Appendix.

### RECOMMENDED CAPITAL EXPENDITURES

The recommended capital expenditures are presented on Schedule II in the Appendix.

The listing of recommended capital expenditures (Schedule II) is relatively comprehensive, consisting of what are considered “Higher Priority Projects” over the next five years. It includes many projects, all of which are worthwhile. The Authority may well pursue any of these projects listed within the next several years. The Authority and the community it serves, however, do not derive the same benefit from every one of the projects listed. Also, the Authority does not currently have sufficient funds available to pursue all of these improvements at once.

Schedule II in the Appendix includes a summary of the funds available to support the capital improvement program.

### METER REPLACEMENT PROGRAM

The Authority has begun replacing its existing meters, most of which are in excess of 20 years old, with new Sensus iPERL water meters starting in the Spring of 2023. Meter replacements are scheduled to occur over several years, ending in December of 2027.

The new Sensus iPERL meters are expected to greatly improve the accuracy of the Authority’s meter readings. With no moving parts, lead-free iPERL water meters maintain their accuracy over a 20-year lifetime. Initially, meter water consumption will continue to be read using the current drive-by mode. Fully automated meter readings will be phased in at a later date, and will give customers the ability to receive and act on leak alerts. The ability to quickly identify leaking water within the home will help eliminate unnecessary water loss and save customers from incurring additional consumption costs.

### RATES

It is recommended that the Authority maintain its current rates for water consumption, which were adopted on July 1, 2024. It is anticipated that the PWSA will present an approximate rate increase of 20% to the Authority for 2026. The current Authority rates, which are shown on Schedule IV in the Appendix, will allow it to continue its capital program.

It is anticipated that the current rates for water consumption will be sufficient to enable the Authority to keep pace with inflation and meet its capital improvement goals. However, any significant increase in the cost of water to be purchased from the supplier, the Pittsburgh Water and Sewer Authority, could necessitate a rate increase. Information concerning the Authority's ability to meet the rate covenant provisions is presented on Schedule III in the Appendix.

### CONCLUSIONS

The Authority continues to strive for excellence in fulfilling its public water supply duties. Beginning in 1994, it embarked upon a program of capital renewal. Since 1994, the Authority has invested in excess of \$30,000,000, both to replace its older and problem-prone facilities and to improve the level of public water supply and fire protection service it provides. During that same period, the Authority has continually re-examined its procedures, policies, and methods of operation with both excellence of service and efficiency as goals.

The Authority is, in a very responsible way, taking those actions necessary to assure the community will continue to have a safe and reliable public water supply.

Respectfully submitted,

\* General wages and salaries and general employee expenses is for time not charged to specific maintenance categories (mains, pump stations, etc.) or to leak detection, reading and collecting, miscellaneous jobbing, or to customer taps. General wages and salaries and general employee expenses are also for time charged to paid time off (vacation, illness, personal time, and holidays).

^ All non-direct charges, except for paid time off (vacations, holidays, personal time, and illness), have been apportioned between the appropriate operating line items and also to force account capital. All paid time off is included as part of the operating budget and none is shown as being charged to force account capital.

\*\* Charges to Fuel and Oil and Vehicles and Equipment include costs related to force account capital improvements.  
\*\*\* Figures represent year-end adjusted numbers.

# Numbers based on the 2024 Water Allocation Report.

\* For Year 2023, year ending November 30th, Active and Inactive Customers.

\*\* Prior to 2018 - Unaccounted-for Water = Water Delivered - (Water Sold + Measured Non-Revenue Use).

Prior to 2018 - % of Unaccounted-for Water = Unaccounted-for Water ÷ Water Delivered.

^ Measured Non-Revenue Use = (metered water supplied to Authority office, garage and River Road) + (measured use during flushing, tank emptying & municipal road crew use). No other adjustments (breaks, leaks, fires, etc.) are included.

^^ Peak day water delivery expressed as a percentage of the average daily delivery throughout the year.

Unaccounted-for Water = (Pumpage - Resale) - (Sales + Measured Non-Revenue Use).

% of Unaccounted-for Water = Unaccounted-for Water / (Sales + Measured Non-Revenue Use).

\*\*\* Year 2020 and forward, Water Delivered is total water delivered including resale.

**SCHEDULE XI**  
**RECORD OF GROSS ANNUAL CONSUMPTION BY CUSTOMER CLASS (Gallons)**

| Year* | Residential | Commercial  | Industrial | Municipal  | Resale     | Total       | Total<br>(Resale Not Included) |

| <b>TOTAL</b>                                                    | <b>101,037,000</b> |

Notes:

Actual consumption numbers from VUB, Total 2025 consumption was summed and compared.

Consumption was summed by unique account numbers (by tap),

this means companies total consumption might not be reflected if they have different accounts.

This list does include the resale customers of Blawnox Borough & Aspinwall Borough which would be FCA's

1st & 3rd largest customers with annual consumption at 36,809,640 gallons and 17,831,000 gallons respectively.

This list does not include fire meter accounts into consideration.

Figures represent and accuracy of +/- 2% due to active versus in-active customers and/or rounding.

## SCHEDULE XV INSURANCE COVERAGE

### CURRENT RECONSTRUCTION/REPLACEMENT COSTS OF INSURED FIXED ASSETS

#### RECONSTRUCTION/REPLACEMENT COSTS AS OF SEPTEMBER 2023

| <u>ITEM</u>                               | <u>BUILDINGS</u> | <u>CONTENTS</u> | <u>TOTAL</u> |
|-------------------------------------------|------------------|-----------------|--------------|
| River Road Station*                       | \$3,220,926      | \$1,610,463     | \$4,831,389  |
| River Road Pre-Fabricated Garage          | \$102,082        |                 | \$102,082    |
| Booster Station                           | \$734,828        | \$866,853       | \$1,601,681  |
| North Tank                                | \$1,866,189      |                 | \$1,866,189  |

| Wise Hill Tank                            | \$1,771,825      |                 | \$1,771,825  |
| Delafield Reservoir                       | \$489,390        |                 | \$489,390    |
| RIDC Reservoir                            | \$3,914,602      | \$61,356        | \$3,975,958  |
| Office                                    | \$1,256,890      | \$189,551       | \$1,446,441  |
| Maintenance Center                        | \$1,706,251      | \$794,526       | \$2,500,777  |
| SCADA System                              |                  | \$1,161,538     | \$1,161,538  |
| Rockwood Drive Station                    | \$369,586        | \$637,986       | \$1,007,572  |
| TOTAL RECONSTRUCTION-<br>REPLACEMENT COST | \$17,224,332     | \$5,498,015     | \$22,722,347 |

|                                            |      |
|--------------------------------------------|------|
| January 2026 ENR Building Cost Index ..... | 4.1% |
| January 2026 ENR Material Cost Index ..... | 2.9% |

\* As the River Road Station has been converted from a water treatment plant to a water booster station, should sufficient damage occur to the facility, it could be less expensive to demolish the existing facility and build an entirely new booster facility. Thus, this cost has been included in the above tabulation.

### SCHEDULE OF INSURANCE PROVIDED

#### 1. Workers Compensation

Carrier ..... Municipal Risk Management  
Policy Number ..... MRM-143-2526  
Term ..... 10/1/2025 to 9/30/2026  
Coverage ..... \$2,000,000 (Statutory limit)  
Premium ..... \$47,374

#### 2. Excess Liability Policy for Public Officials

Carrier ..... Kinsale Insurance Company  
Policy Number ..... 0100420154-0  
Term ..... 01/01/2026 to 01/01/2027  
Coverage ..... \$5,000,000 - Aggregate and each occurrence  
Premium ..... \$8,185

#### 3. Public Officials Employment Practices

Carrier ..... Atlantic Specialty Insurance Company  
Policy Number ..... MML-009589-0126  
Term ..... 01/01/2026 to 01/01/2027  
Coverage ..... \$10,000,000 with \$1,000 retention/claim  
Premium ..... \$9,433
